

Arjun Gururajan

SOFTWARE ENGINEER III / BACKEND & CLOUD

nag9209@gmail.com

github.com/arjun9218

Bengaluru, India

PROFILE

Software Engineer III at Condé Nast with 10+ years building production software. Focused on high-throughput APIs, event-driven services, AWS infrastructure, and cost-aware platform design, with a foundation in full-stack product engineering.

TECHNICAL SKILLS

Backend & APIs	JavaScript, Node.js, Go, Hapi, Express, REST, GraphQL
Cloud & delivery	AWS (SQS, SNS, Lambda, EC2, S3, IAM, Secrets Manager), Terraform, GitHub Actions, Kubernetes
Data & insight	MongoDB, SQL, Kafka / Confluent, CloudWatch, Splunk, Datadog

EXPERIENCE

Software Engineer III / II | Condé Nast 2019 - Present

- **Newsletters & subscriptions (2023 - present):** Built a high-throughput core API, an orchestrator for downstream delivery, and efficient scheduled jobs. Helped replace legacy Kafka flows with a more cost-effective queueing system.
- Provisioned AWS infrastructure with Terraform and deployed services through GitHub Actions; contributed to architecture decisions for the subscription platform.
- **The New Yorker mobile backend (2022 - 2023):** Built a brand-agnostic Node.js / Hapi service that transforms Content API data for the iOS app and powers RSS feeds across brands.
- Developed notification preference services using SQS, MongoDB, and Kafka; deployed the mobile backend using Departures.
- **Flagship newsletters (2021 - 2022):** Created a reusable Handlebars library for newsletter HTML and extended Copilot CMS backend workflows to support newsletter creation.
- **Shared publishing platform (2019 - 2021):** Delivered React and Next.js changes in a monorepo serving roughly 40 Condé Nast brands, with Cypress automation coverage.

Senior Software Engineer | Synamedia 2018 - 2019

- Built OpsHub Console features across frontend, backend, and MongoDB; developed a reusable microfrontend approach and supported Cypress testing and Kubernetes deployments.

Software Engineer / Contractor | OpenText 2014 - 2018

- Built enterprise workflow and invoice applications with AngularJS, Java / Spring, and MySQL, from implementation through deployment and stakeholder demos.

EDUCATION

M.E., Computer Science - University Visvesvaraya College of Engineering (UVCE) (2013 - 2015)

B.E., Information Science - Channabasaveswara Institute of Technology (2009 - 2013)
